SUMMARY

Highly motivated Computer Science graduate from University of Toulouse III with a strong foundation in software development, low-level programming, and network systems. Fluent in English and French, equipped with an international perspective and strong analytical skills.

ACADEMIC & TECHNICAL PROJECTS

Interactive 2D Desktop Game | University of Toulouse III | 2026

- Developed a fully functional 2D desktop game utilizing Java and the Java Swing framework for the graphical user interface.
- Implemented Object-Oriented Programming principles, custom game loops, and event handling.
- Managed software layout components and optimized graphic rendering to ensure a smooth user experience.

GEETS Doctoral School Website Redesign Project | University of Toulouse III | 2026

- Collaborated in a team to restructure the official platform architecture, improving user interface and user experience.
- Developed clean and responsive front-end components using HTML, CSS, JavaScript to ensure cross-device compatibility.
- Analyzed user workflows to simplify navigation pathways and modernize the overall digital platform aesthetics.

Cryptography & Cryptanalysis Tool | University of Toulouse III | 2024

- Developed a robust command-line application using C dedicated to message encryption, decryption, and secure key management.
- Implemented symmetric encryption methods including XOR and CBC (Cipher Block Chaining) with Initialization Vectors (IV), alongside a simulator for secure Diffie-Hellman key exchanges.

EDUCATION

Bachelor of Computer Science | 2022 - 2026

University of Toulouse III - Paul Sabatier, France

Diploma in Telecommunication Access Network Engineering | 2018 – 2021

SMK Telkom Jakarta, Indonesia

ACHIEVEMENTS

- 1st Place Winner: National Video Game Development | Olimpiade TIK Nasional (PGRI) | Nov 2019
- 2nd Place Winner: Web Design Competition | Lomba Kompetensi Siswa (LKS) | Oct 2019
- 2nd Place Winner: National Mobile Application Development | Lomba Aplikasi Mobile Kihajar | Sep 2019

TECHNICAL SKILLS

- Java / C#: Object-Oriented Programming
- Python: Scripting, automation, and data analysis.
- C: Systems and low-level programming.
- Version control: Use of Git
- Systems: Proficient in the Linux environment

LANGUAGES

- Indonesian (Native)
- English (Professional - TOEIC 935/990)
- French (Professional - DELF B2)

ADDITIONAL EXPERIENCE

Part-Time Student Worker | CROUS Toulouse (France) | Sep 2023 – 2026

- Demonstrated strong time management and resilience while balancing rigorous academic demands.
